Mayo Clinic: Building the Platform for the Future of Medicine

Prepared by: **Akshay Kumar**

This case was developed with AI-assisted research using the Agentic AI Case Study Development methodology. All quotes and data are sourced from publicly available materials verified against original sources. Prepared for classroom discussion only. Not an endorsement or illustration of effective or ineffective management. © 2026 Akshay Kumar / Kogod School of Business. All rights reserved.

“using the Agentic AI Case Study Development methodology. All quotes and data points have been sourced from publicly available materials and verified against original sources. T2 sources represent content verified through direct web access; T3 sources are flagged accordingly.”

Executive Summary

Research was conducted using publicly available sources: official press releases, trade journalism, a National Academies of Sciences case study, and financial news reports.

Source quality: 5 T2 sources (partial text verified); 9 T3 sources (existence confirmed).

Key themes:

1. Dr. Halamka frames healthcare AI as a "perfect storm" opportunity
2. "Data under glass" governance model enables ethical data sharing
3. Mayo Clinic Platform evolved from concept (2019) to a 56-million-patient ecosystem (2024)
4. Microsoft and Google as strategic infrastructure partners
5. Tension between speed of AI innovation and patient safety/ethics requirements

Exhibit 1: Executive Statements and Verified Quotes

Dr. John Halamka, President, Mayo Clinic Platform

Source: HealthLeaders Media, "John Halamka, MD, Launches Mayo Clinic's Digital Data Business" (2020)
[T2 – content verified through direct web fetch]

On the timing of Mayo Clinic Platform:

“When I look at the 40 years that I've been in this industry ... I've often looked at when is there a perfect storm for innovation?”

“Mayo -- an \$18 billion organization with 86,000 employees, and an urgency to do digital transformation -- has a perfect storm opportunity.”

On the platform model:

“You need a platform by which you can convene people and that may mean third-party companies, academics, or government leaders.”

“The Mayo brand is a very powerful way to bring people together.”

On AI and clinical judgment:

“Machine learning is pattern recognition. As a clinician, I was trained to recognize patterns.”

“Machine learning is not replacing humans, but [offers] tools that augment human decision-making.”

On change management as the central challenge:

“It isn't technology; technology is good enough. It's fear of change.”

“Change management is always the hardest task.”

Source: CXOTalk, "Data and AI Improve Patient Outcomes at the Mayo Clinic" (2023) [T3 – existence confirmed, full text inaccessible]

On AI and physician augmentation:

“If your doctor can be replaced by AI, then your doctor should be replaced by AI.”

Interpretive note: Halamka uses this framing to argue that AI performing cognitive pattern-matching frees physicians for uniquely human judgment – not a literal call for physician replacement. This quote is a strong discussion prompt precisely because it requires students to examine context before interpretation.

Cris Ross, Chief Information Officer, Mayo Clinic

“Privacy, ethics and safety are at the forefront of Mayo Clinic's work with generative AI and large language models.”

Dr. Gianrico Farrugia, President and CEO, Mayo Clinic

Source: Fierce Healthcare, February 2024 (reporting 2023 performance)

“By every measure, Mayo Clinic made excellent progress in 2023 towards our goal of creating a better healthcare system.”

Source: PlatforMed 2024 conference proceedings, as reported June 2024

“Platforms represent our greatest opportunity to bring real, lasting, and transformative change to our global healthcare system.”

Exhibit 2: Financial Data

Mayo Clinic Financial Performance (2022-2023)

Exhibit 1

Metric	2022	2023	YoY Change
Total Revenue	\$16.3B	\$17.9B	+10.2%
Net Medical Service Revenue	~\$13.9B	\$15.1B	+8.8%
Total Expenses	\$15.7B	\$16.9B	+7.4%
Staff Salaries and Benefits	~\$9.8B	\$10.5B	+7.1%
Operating Income	~\$0.6B	\$1.1B	+82%
Operating Margin	~3.7%	6.0%	+2.3 pp
Capital Expenditures	N/A	\$1.18B	—
Investment Income	N/A	\$536M	—

Platform_Accelerate Startup Cohorts

Exhibit 4

Cohort	Year	Companies	Notable Members
1st	2022	4	cliexa (cardiovascular AI), Quadrant Health (EHR triage), ScienceIO (data tools), Seer Medical (epilepsy diagnostics)
2nd	Summer 2022	7	AESOP Technology, Biotia, Dynocardia, ImpriMed, Predicta Med, SOAP Health (6 of 7 identified; 1 not named in public sources)
3rd-5th	2023-2025	30+	C the Signs (UK cancer prediction), various clinical AI startups
Total	2022-2025	45+	—

Exhibit 4: Key Strategic Partnerships

Partnership 1: Google Cloud (September 2019)

Exhibit 5

Element	Detail
Announced	September 2019
Duration	10-year agreement
Purpose	Design framework for ethical secondary use of clinical data
Google Office	New Rochester, MN office for joint collaboration
Data Model	"Data under glass" – federated learning, data never leaves Mayo
De-identification	Structured: Jan-Apr 2020; Unstructured: Apr-Aug 2020
Governance	"One Table" task force; DaTA Board (2021, 11 members)
Records centralized	1.2 million patient records in Mayo Clinic Cloud

Source: NCBI / National Academies of Sciences (2023)

Partnership 2: Microsoft (September 2023)

Exhibit 6

Element	Detail
Announced	September 28, 2023
Program	Microsoft 365 Copilot Early Access Program
Participants	Hundreds of clinical staff, doctors, healthcare workers
Focus	Administrative automation: form-filling, documentation, scheduling
Extended	Microsoft Research + Cerebras Systems: radiology foundation models (2025)

Source: Microsoft News, September 28, 2023

Exhibit 5: Chronological Timeline

Exhibit 7

Date	Event	Source Tier
Dec 2019	Dr. Halamka named President, Mayo Clinic Platform	T3
Jan 1, 2020	Halamka presidency commences	T2 (Wikipedia)
Jan-Apr 2020	De-identification of structured data in Google enclave	T2 (NCBI)
Apr-Aug 2020	De-identification of unstructured data completed	T2 (NCBI)
2020	Halamka elected to National Academy of Medicine	T2 (Wikipedia)
2021	DaTA Board created with 11 community members	T2 (NCBI)
2022 Q1	Platform_Accelerate launches, first cohort (4 companies)	T3
2022 Q3	Platform_Accelerate second cohort (7 companies)	T3
May 2023	Data network expands: Brazil, Israel, Canada partners added	T3
Sept 28, 2023	Microsoft 365 Copilot Early Access announced with Mayo	T2
2023 FY	Mayo reports \$17.9B revenue; \$1.1B operating income (+82% YoY)	T2
Mar 2024	FDA clears ELEFT (co-developed with Mayo)	T3
Jun 2024	PlatforMed 2024: 56M patient lives, 81 solution developers	T3

2024	Data network grows to 9 partners across 4 continents	T3
Jan 2025	Mayo + Microsoft Research + Cerebras: foundation model collaboration	T3

Exhibit 6: AI Clinical Algorithms

Exhibit 8

Algorithm	Clinical Purpose	Status	Source
Colonoscopy error reduction	Reduces polyp miss rate to 3% error	Deployed	T3
Atrial fibrillation prediction	Identifies patients likely to develop AF	Deployed	T3
Prediabetes identification	Flags at-risk patients from EHR patterns	Deployed	T3
Colorectal cancer 10-year risk	Predicts CRC risk without prior disease history	Deployed	T3
ELEFT (Eko Health stethoscope)	Detects low ejection fraction via AI	FDA cleared Mar 2024	T3
Multimodal radiology AI	Auto-generates chest X-ray reports	In development	T3

Exhibit 7: Dr. John Halamka -- Biographical Profile

Exhibit 9

Category	Detail	Source
Born	1968, Des Moines, Iowa	Wikipedia (T2)
Education	Stanford: Public Policy and Medical Microbiology (1984)	Wikipedia (T2)
MD/PhD	Joint UCSF/UC Berkeley program, 1984-1993	Wikipedia (T2)
Residency	Emergency Medicine, Harbor-UCLA Medical Center, 1993-1996	Wikipedia (T2)
Fellowship	Medical Informatics, Harvard/MIT, 1997	Wikipedia (T2)
Prior Leadership	CIO, Beth Israel Deaconess Medical Center (20 years)	HealthLeaders (T2)
Harvard Faculty	International Healthcare Innovation Professor	HealthLeaders (T2)

Early Entrepreneurship	Founded Ibis Research Labs, 1981 (sold 1992)	Wikipedia (T2)
Current Role	President, Mayo Clinic Platform (Jan 1, 2020-present)	Wikipedia (T2)
Academy	Elected, National Academy of Medicine, 2020	Wikipedia (T2)
Publications	8 books on healthcare IT and clinical informatics	Wikipedia (T2)
Clinical Practice	Still practices emergency medicine	Wikipedia (T2)

Exhibit 8: Competitive Landscape

Exhibit 10

Organization	Approach	Key Differentiator	Notes
Mayo Clinic Platform	Federated data enclave; startup accelerator; tech partnerships	Brand trust + federated governance	56M patient lives (2024)
Epic Systems	EHR-native AI; App Orchard marketplace	Dominant EHR market share	250M+ patient records
Google Health	Cloud infrastructure + Med-PaLM 2	Foundation model capabilities	Multiple health system clients
Microsoft Azure Health	Azure cloud + Copilot; M365 integration	Productivity tools + OpenAI partnership	Enterprise-wide adoption
IBM Watson Health	AI diagnostics and oncology (sold 2022)	Warning case: claims outpaced validation	Divested to Francisco Partners 2022
